Real IT Certification Exam Study guide/Braindumps

Exam : **1z1-1077**

Title : Oracle Cloud Material
Management & Logistics 2019
Implementation Essentials

Vendor : Oracle

Version : DEMO

NO.1 Your company wants a category of goods to be globally sourced for certain regions in Europe. After setting up the sourcing rules, you attempt to assign them by using the Category and Region option, but the category is not on the list of values.

What is the problem?

- A.** A category set has not been selected under the Sourcing Rule Category Set prole option.
- B.** The Default Sourcing Assignment Set prole option is not set.
- C.** The Default Sourcing Assignment Set prole option is set to a category set for the Item category set structure.
- D.** The category set that is associated with the Sourcing Rule Category Set prole option is controlled at the organization level.

Answer: A

NO.2 Your customer is using Oracle Social Network for Order Management. They claim a conversation is being created for every order in the system, and that this is not required for automated order fulfillment.

What can be changed so that Oracle Social Network only creates conversations for sales orders that need them?

- A.** Turn off all conversations in Oracle Social Network.
- B.** When enabling the Sales Order object for Oracle Social Network, use the automatic mode.
- C.** When enabling the Sales Order object for Oracle Social Network use the manual mode.
- D.** Remove access from users for certain orders that do not require conversations.
- E.** Disable the Sales Order object for Oracle Social Network.

Answer: C

Explanation

Create social conversations only for conversations that the Order Entry Specialist manually initiates for each sales order. It is strongly recommended that you choose Manual.

NO.3 A revision was made to an existing sales order in Order Management Cloud. But it did not trigger a change order.

Identify the attribute that was modified during the revision of the sales order.

- A.** Ordered Quantity
- B.** Requested Ship Date
- C.** Unit Selling Price
- D.** Customer PO
- E.** Ordered UOM

Answer: D

NO.4 Which step must be performed before enabling a new inventory organization in SCM cloud for collection from Manage Upstream and Downstream Source System Task?

- A.** Create a new source system for each organization.
- B.** Refresh the Organization List against the Oracle Planning and Sourcing (OPS) source system.
- C.** Add the Organization against the OPS source system manually.
- D.** Add the Organization against the OPS destination system.

Answer: B

NO.5 Your company wants to define different status conditions for fulfillment lines that have different categories assigned to a single orchestration process in Order Management Cloud. Which two configurations would you perform to meet this requirement? (Choose two.)

- A. Define a fulfillment line status rule set for each category.
- B. Assign the status catalog to the orchestration process.
- C. Create a unique step for each category and assign different "next expected task statuses."
- D. Define orchestration process status values for each category.

Answer: B,D

Explanation

An orchestration process is a predefined business process that coordinates the orchestration of physical goods and activities within a single order and automates order orchestration across fulfillment systems.

NO.6 Your customer is in the business of selling laptops.

Which three seeded pricing attributes are available when you set up Customer Pricing Profiles for your customer? (Choose three.)

- A. Customer rating
- B. Customer credit limit
- C. Customer value
- D. Days Sales Outstanding
- E. Cost-to-serve

Answer: A,C,E

NO.7 Your customer would like automatic e-mail notifications to be sent for specific business events. On the Manage Business Event Trigger Points page, which business event trigger points can be used to enable e-mail notifications?

- A. Change order compensation complete and hold
- B. Order header status update and order attribute update
- C. Hold and split
- D. Order header status update and hold
- E. Order attribute update and hold

Answer: A

NO.8 Your company has a single global installation that contains Oracle Cloud Product Management, Oracle Cloud Trading Community Model, and Cloud Order Management. It has all the execution systems implemented in tandem with Global Order Promising. The Master data elements have also been migrated to their respective areas. The next step is to run the data collection program to load the planning data repository.

Which five data elements will the collection program load into the planning data repository? (Choose five.)

- A. Suppliers
- B. Cross-referenced data
- C. Customers
- D. Currencies
- E. Calendars
- F. Shipping methods
- G. Items

Answer: A,B,C,E,G
