Answer:

See the solution in the explanation below:

group dynamic membership rules. Here are the steps to follow:

- * Create a new team in Microsoft Teams as you would to create a normal team. Name it US Sales. If the team already exists, you can skip this step.
 - * Sign in to the Azure portal with your admin credentials.
 - * Go to Azure Active Directory > Groups. Find the group that corresponds to the US Sales team and select it.
 - * On the group details page, select Properties on the left menu and change the membership type to Dynamic user. Click Save.
 - * On the same page, select Dynamic membership rules on the left menu and add an expression that dynamically retrieves the users that have the department attribute set to Sales. In this case, the expression is `user.department -eq " Sales "`. Click Save.
